VACANCY ON SCHOOL BOARD

The nomination for school trustee for Mirror School District, No. 552, will take place on Wednesday, January 14th, at 3 o'clock p.m. Thirty minutes will be allowed for the nomination of candidates, and in the event of an election, the poll will be open from 3.30 to 5.30 the same day.

LOCAL NEWS

A number from Mirror attended the annual Masonic banquet and dance in Alx last Wednesday evening. Over 100 guests were in attendance and the affair was a grand success.

A Moll, of Acme, Alta., has taken over the dairy business of L. L. Cassidy, and will at once increase the dairy herd, so

as to be in a position to supply townspeople with milk. He has rented J. R. Smith's place just west of town.

The drawing for the prizes put up by the Mirror Cash Store during the week between Xmas and New Years, took last Wednesday evening and the following were the winners with the numbers and prizes: W. C. Gardiner, Mirror, 49, doll; Mrs. W. Lowry, Mirror, 4, work basket; S. H. Tremaman, Tremville, Alta, 283, box of chocolates.

School opens on Monday, January 5th.

Miss Annie McLeod is home from the Ladies' College at Red Deer, for the holidays.

Notice appears in the Alberta Gazette, of Dec. 15th, of the appointment of W. C. Gardiner, Mirror, as official auditor for 1914.

Council meeting next Monday evening.

MIRROR WINS MANY PRIZES

The fourth annual skating carnival, held under the auspices of the Buffalo Lake Skating and Boating Club was held at Bar Harbour on Thursday, Jan. 1st, and out of thirteen events, persons from Mirror and vicinity figured in the nine. Following is the list of Mirror winners: Ladies' half mile, Hila J. Simpson, 1st; men's, one mile, Clyde Pitman, 2nd; girls' 16 and under, Hila J. Simpson, Delta E. Simpson, Blanche E. Barton, (Oh! you sweet sixteen's); Boys' 14 and under, Gordon Tulloch; double, Hila J. Simpson and Bert Tulloch; men's backward one half mile, Ross Estell, South Buffalo Lake, Clyde Pitman; double, gent backward and lady forward, Ross Estell and Hila J. Simpson. The race for the championship of Buffalo Lake, was won by Bert Tulloch, of Mirror, his opponent being Fred Holder. The race was run in three heats, the first one, of one mile, going to Holder; the second, two miles, being won by Tulloch; and the third and deciding heat, a distance of three miles, being won by same. This makes the second year in succession that the latter has carried off the honors. H. P. Crittall won the endurance race, having skated the sixteen miles from the boat house landing to Bar Harbour. Although this event was not on the program, he will probably be presented with a medal by his admiring friends. Earl Estell carried the Mirror contestants across Buffalo Lake to the race course in his automobile, with the aid of several cutters attached to the rear of his machine.

The exceedingly mild weather of the past few months has been the subject of much discussion, and from a town in Manitoba comes the report of gentlemen picking a bunch of pansies from his garden last month. Mirror can go one better, however, as Mrs. E. Webster, of this place, captured a live butterfly in her garden last Wednesday. The butterfly is now on exhibition at THE JOURNAL office.

BUTTERFLY CAUGHT IN MIRROR

No better proof of the mildness of weather of the past winter could be given, and it is not often that winged insects of the butterfly variety can take a constitutional on the last day of the year.

AT THE IMPERIAL

Friday, Dec. 25.—W. Mewing, Chicago; R. E. Morgan, Three Hills; W. G. and Mrs. Glendenning, Mrs. Mitchell, Delburne; H. B. Bowman, and family, Carbon; R. S. Shuttleworth, Delburne; M. A. Jarvis, Bashaw; W. V. and Mrs. Lawrence, Trochu; W. Walker, Edmonton. Saturday.—J. Berry, Viking. Sunday.—Juno, Cunningham; Alx; W. Shipley, Stettler; Martin Shafer, Bashaw. Monday.—R. L. Pretty and wife, Vulcan; Mrs. Sisson, Mrs. Shaw, Trochu; Miss C. Braddy, Edmonton; H. G. Gunn and wife, Mrs. Simond, G. H.

Tremman, Delburne; C. E. Phontgen, Three Hills; E. J. and R. S. Shuttleworth, Delburne; T. R. Morgan, Edmonton; W. H. Beggs, Lonsana.

Tuesday.—R. L. Pretty and wife; T. Garnet, and Mr. and Bernard Eckhardt; R. H. Merkle, Edmonton; N. D. Keith, Red Deer.

Wednesday.—W. Mewing, Wagg, B. G. Rows, Edmonton; W. Shipley, Stettler; W. Weicker, Three Hills; M. Kleinknecht, Acme; John Cunningham, Alx.

Thursday.—W. Walker, Edmonton; Alex. Mather, Alx; J. R. Lanley, Ft. William.

SCHOOL BOARD

The Mirror School Board met last Tuesday evening; in the absence of W. G. Merkle, the chairman, W. G. McCormack, occupied the chair.

Several accounts were ordered to be paid.

Miss Higgins was re-engaged as junior teacher. It was decided to secure an estimate on the cost of sanitary arrangements for the school. The equipment, such as desks, maps, etc., will be purchased from the Alberta Supply Co., of Edmonton.

1,220 DEATHS IN CANADA

Ottawa, Dec. 27.—The toll of death from industrial accidents throughout Canada last year cost the lives of no less than 1,220 workmen, while 5,780 received serious injuries. Thus 7,000 workers in Canada's industrial army met with fatal or serious accidents.

The metal trades and the railway services are by far the most hazardous employments. On Canadian steam railways 382 employees were killed last year and 1,831 were injured. In addition to that there were 152 men killed in railway construction work and 111 injured. In the metal trades 103 men were killed and 1,326 were injured. There were 69 fatal and 62 non-fatal accidents in connection with navigation.

In the railway service collisions caused 55 deaths and 174 non-fatal injuries to railway men. There were 91 killed and 104 injured through being run over by trains. Derailments caused 25 deaths and 115 injured.

Dynamite explosions killed 50 and seriously injured 37 in railway construction.

Fifteen public employees were killed and 296 were injured while on duty. Four were fatally shot while making an arrest. One fireman was killed and 31 injured by being thrown from fire apparatus, and 27 were injured through collisions with street cars, etc. Two accidents are put down to "frozen while fighting fires." Street cleaners, who to the casual observer always seem to be in immediate peril of sudden death, apparently bear charmed lives. In the list of accidents the public employees only two are ascribed to being run down by street cars or vehicles. The department's figures are tabulated from provincial figures supplied by industrial concerns and press reports.

Miss Cressie Gilbert, of Essex, Alta., is visiting with her sister, Miss May Gilbert, this week.

Mr. and Mrs. R. L. Pretty, of Vulcan, Alta., have taken up their residence in town. Mr. Pretty is the new principal of Mirror school.

The Final Whist Drive will be held in the Library building on Wednesday evening, Jan. 7th. Prizes will be awarded then to the winners of the series, which have been conducted by the Library Club.

Marl Hart was sent to the General Hospital at Edmonton last week, suffering from an attack of typhoid pneumonia. At last report he was improving.

P. M. Carmichael, teller in the Canadian Bank of Com-

merce, Mirror, returned last night (Thursday), from a three weeks' vacation in Saskatchewan and other points.

Start 1914 by subscribing for THE JOURNAL.

Homestead entries for the first ten months of 1913, show a falling off of 4,415. The decrease is evident in all of the three Western provinces. Saskatchewan had this year 11,039, against 15,543 for the same period last year; Alberta had 10,142 against 11,886; Manitoba, 2,326 against 2,690. British Columbia, on the other hand, supplied more free farms this year than last.

Shattered

A young man recently got married

and took a cottage, determined to

grow enough vegetables to keep the

household going. He started to dig

up the garden, and after his father's

hard work was astonished to find a

shilling at the foot. Then he dug a

second row. Several pennies, a

shilling, and three halfpence reward

he got.

Well, if this ain't a good mine! he

thought, digging away for it. He

was a little disappointed when he

found his arms ached. Little beads of

perspiration trickled down his nose, and

his neck felt as though it were being

strangled. He could stick it no longer.

He straightened his back at last with

a groan of pain and at the same time

felt something cold sliding down his

leg. In a moment he had grasped the

truth. There was a hole in his

trousers pocket!

Minard's Liniments Cures Burns, Etc.

A certain little girl in East Cleve-

land has been ill for some time. Not

so terribly ill but enough so that she

couldn't go to school and had to go

to a great deal of petting and indulgence.

The other day she said to her mother,

"Mamma, I want papa to buy me a

big building."

Well, dearie, smiled the mother,

will have to see about that after a

while."

"No, I want it right now."

Does you think you'd better wait,

til you are well?"

"No, mamma, I don't. The sicker

I the more likely papa will be to

buy it for me."

FIRE IN THE

HUMAN BODY

The body is like a furnace, and the

fire is burned or kindled just as

coal is burned in a furnace. When

there is a large amount of food taken

the digestive system is damaged, the

food ferment, and forms poisons.

Gases and waste substance which

cause pain and achiness, rheumatism

is a serious disease.

Billions attack, headache, liver dis-

orders and kidney diseases start their

beginnings in overeating or the use

of food which disagrees. To prevent

serious disease it is absolutely essen-

tial to keep regular and active by use

of such treatment as Dr. Chase's

kidney-liver pills.

On account of artificial foods and

modern methods of life almost every

body needs it necessary to use medi-

cine in order to keep the organs in

active working condition. Dr. Chase's

kidney-liver pills are most satisfac-

tory because you do not feel them

to produce the desired effects.

Drives Asthma before it. The

smoke or vapor from Dr. J. C. Kild-

re's Asthma Remedy gives asthma

no chance to linger. It eradicates

the cause of the disease. It gives

relief-giving remedy above any actual

and positive in the success it gives.

It is the result of long study and ex-

Rather Hard

Gaspit—Yes, I am a self-made

Cynic—Well, I must say you are

entitled to a great deal of credit for

your charitable act.

Gaspit—What charitable act?

Cynic—Believe, Heaven of the

responsibility.

It was going to start an anti-suffrage

association, and the man who is

ways promoting something.

Well, the first thing is to get the

public interested. I have already en-

gaged half a dozen speakers and

brain trust.

A physician was driving through a

village when he saw a man amusing

himself with the ankle of his trick

horse. The doctor pulled up and said:

"My dear man, how do you manage

to train your horse that way? I can't

teach mine a single trick."

The man glanced up with a simple

jesting look and replied: "Well, you

see, it's this way: You have to know

more than the dog or you can't learn

him anything."

The teacher in a country school al-

ways tried to make his lessons as

interesting as possible.

Now children, she said, let me see

what you remember about the animal

kingdom and the domestic animals that

belong to it. You have named

the domestic animal, but one. Who

can tell me what that one is?

There was no reply.

What exclaimed teacher. Does no

one know? It has briefly har-

ness the dirt and is fond of getting

into a mud.

A small boy at the head of the class

raised a timid hand.

Well, Allen, said the teacher.

Please, man, said the little boy

reflectively, it's me.

After the fire that destroyed Bar-

num's museum, the proprietor com-

mitted his friends to select anything

course. He told them he had a for-

get and could easily retire from

business.

Among his friends was Horace Gre-

en.

What shall I do asked Horace.

If I were you, replied Greasen,

I would go fishing. I have been try-

ing for thirty years to go fishing, and

have never been able to do it.

A Boston man has a son who has

just entered school. He was suppo-

sed to be enjoying it, but one morn-

ing he walked into the dining room

where his father was having break-

fast and remarked:

"I'm tired of going to school, pa. I

think I'll stop."

What asked the father. What's

the objection to going to school?

It answered the boy. It breaks up

the day.

The celebrated French poet Saint-

Exupery, who, in spite of his large in-

come, was always in debt, set one

day in a barber's shop waiting to be

shaved. He was already, however, when

the door opened and a tailor en-

MAPS OF TEMPERATURE

Canadian Professor Makes Suggestions as to Overcoming the Iceberg Peril

Professor Barnes, of McGill University, Montreal, submitted to the Minister of Marine and Fisheries, an interim report on his investigations of methods whereby ships may be warned of the presence of ice or land. The professor regards the results of his work as highly satisfactory.

Professor Barnes has now for three years investigated conditions in the St. Lawrence, in the Straits of Belle Isle and along the Labrador coast. The Department of Marine and Fisheries supplies him with a steamer.

The concluding portion of Professor Barnes' report was as follows: "Very important results have been obtained indicative of methods which should be adopted for equipping ships for avoiding ice and land. The experiments have been so decisive and reliable that I must strongly recommend that attention be directed by the Government and by steamship companies towards adopting accurate temperature recorders on board ship."

"Again I must emphasize that it is to a study of the variations of temperature in the sea and not the temperature of the air that the ship captains should give their attention. The experiments have shown that the sea is much warmer than the air, and that the sea is much more variable in temperature. It is therefore essential that the ship captains should be equipped with accurate temperature recorders on board ship. The experiments have also shown that the sea is much more variable in temperature than the air, and that the sea is much more variable in temperature than the air. It is therefore essential that the ship captains should be equipped with accurate temperature recorders on board ship."

FLESH FLIES

Can Do No Damage If Given No Place to Lay Their Eggs

When the sheep's wool becomes filthy and the skin irritated, an ideal condition is made for the work of the maggot fly. And when the maggots get a start they create a more and more friendly harbor for their kind as they work and increase in numbers under the wool. A sheep infected with maggots is a most pained little help less against the parasites eating out its flesh until the sheep dies, its flesh gnawed out in a most cruel manner. For the sake of humanity, if for no other reason, sheep should be saved from much suffering.

These flies can do no damage if not given a suitable place to lay their eggs. Sheep should be watched carefully, especially in warm days when they are dirty, tag-larks or other filth clipped off and a little tar dabbed on the skin is helpful. These maggots also get in their work under ram horns. Indeed, a ram with heavy horns lying close to his head will hardly pass through a summer without infection unless the flies are kept away by putting some tar on the ram's head.

An infected sheep can be told by the fact that it refuses to eat, stands with its head down and moans often by itself, and stamps its feet for its head exactly as irritation by maggot would lead one to expect. The remedy is simple. Cut away the wool close. Clean out all maggots, using turpentine to wash them out. Bathe the place thoroughly with tar. Then watch the sheep to see that the flies do not again start in the same place. Thoroughness in cleaning out the parasites is essential, for one left in will start the damage all over.

Canada Needs More Hens

From being one of the important egg producing countries Canada has become an importer, the home production being inadequate to supply the demand.

LIVED LONG YEARS AFTER FELL FROM

Parachute Jumper Dies in His Bed Out West, Having Survived a Fall of Half a Mile.

The man who fell 1,000 feet from a balloon lived seventeen years longer than anyone but himself said he would. When crashed and parachuted to the ground by surgeons, he insisted that he would survive to see his family and to die. The great fall occurred in Venezuela in 1895. Seventeen years later, the man died in Edmonton, Alta. after an illness of several months. He was Charles Wolcott, professional aeronaut. There is no record of another experience like his.

Wolcott was the son of a Louisiana planter, who lost everything in the Civil War. The boy joined a circus and, Wolcott hopped on the trapeze performer. He was with Belle Brothers and the original Adam Forepaugh show. In 1892, when Wolcott was eighteen years old, the balloonist and parachute jumper of the circus fell and was killed. The boy succeeded him and made acrobatics his vocation until in the fall of 1895, he went to Venezuela to see what the South American thought of aerobatics.

On Oct. 25 he was in the Ville de Cura with the first balloon ever seen in that region. Thousands of natives were assembled, and Wolcott had no chance to keep them back. While he was busy filling the bag with hot air the Venezuelans were firing his rope and parachute and tramping them in the mud.

Finally the awaying balloon was to be could without checking his descent, and up he went. He averted his eyes after that he arose between 2,000 and 2,500 feet before cutting loose the parachute. At any rate the parachute did not open. The mud tramped into it had fastened the ropes as if with cement. The aeronaut, shooting straight downward, kept his head and tugged at the ropes in an attempt to shake them free. Having done all he could without checking his descent, he made his body ready for what he knew was coming. He remembered that his best chance of avoiding mortal injury, if such a thing could be, was to let the ground find first, so he held his legs rigidly straight with toes pointed downward.

Within 100 feet of the earth the parachute opened, but it was so fast that the air split it covering in half a dozen places. Wolcott hit the ground in the middle of a level field. The survival aeronaut takes many days to disclose that several bones in each foot were broken; that both ankles, both knees and both hips were dislocated; that the pelvis and left arm were fractured; that the ribs on the left side were torn from the spine; that the lower vertebrae were dislocated and slightly cracked; and that there was pressure on the spinal cord.

Wolcott suffered intensely. He sent away the only doctor in the place because the doctor said the only thing to do was to bleed him. He stayed in the hut all night, keeping himself awake by smoking cigarettes, for he believed that he would die if he once became unconscious.

The next morning Wolcott started for the railway station at Capao on a stretcher, guarded by twenty soldiers, and he finally reached the hospital at Caracas.

For three days thereafter he slept under an anesthetic. He was paralyzed from the waist down. The surgeon said he would die if he did not give him the best of treatment. Every fracture and dislocation was reduced, except that of the right hip joint. In a few months he was well enough, though still helpless, to sail for New York.

There he entered St. Luke's Hospital. Gradually he regained the use of his legs and arms, though his right hip remained dislocated and his spine bent. In spite of what he had come through, he was making contracts for parachute jumps within a year of the time he fell.

WEALTH OF FORESTS

British Columbia Trees Add Many Millions to Their Value Yearly.

Outside of the agricultural lands, under water, covered with snow, or still unexplored, it is estimated that there is in British Columbia an area of 45 million acres capable of yielding merchantable timber. Mr. R. H. Benedict, of the Forest Branch, stated that the amount of wood annually added to the standing forests through the natural process of growth, is 100 feet per acre. Hence it would appear that 4 1/2 billion feet of timber is being added as interest to the stock of timber every year. Mr. Benedict places the value of this growth at \$100,000,000 per annum, but benefits in excess of this amount will certainly come. At the present time then, only one-quarter of the annual growth is being returned to the timber community as over \$25,000,000 a year.

Save \$10,000 to Hospital. Just when the Oshawa hospital trustees were considering ways of extending their institution to meet the demands upon it came the announcement of a gift of \$10,000. Mr. and Mrs. George H. Postler for a new surgical wing in memory of their son, George, who died about two years ago. The gift came as a complete surprise.

Navel Grapefruit. James H. Geggatt, an orange grower of Coville, California, has developed a new variety of grapefruit, which bears navel grapefruit, and will use an effort to make the new citrus product commercially popular. The ut is a cross between a navel orange and a grapefruit. Steel cages around the trees to prevent buds from being stolen.

DRIVES ONTARIO BUTTER OUT OF BRITISH COLUMBIA

New Zealand Sells Cheaper in Vancouver Than Ontario Does In Toronto—Interesting Comment of Trade Representative

The Toronto Globe and other advocates of reciprocity are being stripped of their former arguments by the trend of trade in a number of articles which were included in the proposed trade agreement of 1911. In its issue of January 15, the Globe displays the fact that New Zealand butter is selling cheaper in British Columbia than Ontario butter is selling in Toronto, and this with a duty on the New Zealand article. Those who opposed reciprocity can well afford to say "We told you so." With no duty on butter the imports would be greater than ever, and would find their way to the prairie provinces and eastern Canada thus displacing the home product. Here is The Globe's report:

"The best New Zealand creamy butter is selling in Vancouver, British Columbia, at from 54 to 56 cents per pound.

"The best Ontario creamy butter is selling in Toronto at from 35 to 40 cents per pound.

"In view of the fact that this is the

Curious Scientific Prediction. Many people are familiar with the story often told of the great naturalist Cuvier, to the effect that, given a single bone, he could reconstruct the animal to which it belonged. That a somewhat similar law of organization runs through the various species that form families in the animal world is indicated by a quaint case of scientific prediction, to which attention has again been called.

It appears that Ehrenberg, when engaged in a study of the minute animals called diatoms, found that many species were distinguished by the number of rays they possessed. In the series of specimens that he had, however, he could find none having respectively 27, 29, 30, 31, 37, 39, 41, 42, 44, 46, 48 and 49 rays. Still he predicted that the missing species would some day turn up. This prediction has been verified, for two of them have since been discovered, leaving only three to be accounted for.

practically no exports of Canadian butter have been made to Great Britain, and that Canada, once one of the principal sources of Britain's supplies, was compelled last year to go to the other end of the earth for supplies to feed her own people, the above observations, made by The Globe yesterday by Mr. J. Graham Gow, trade representative of the New Zealand Government, are of more than passing interest.

"Not only is New Zealand butter selling in Vancouver at the rate of three pounds for a dollar, which is much cheaper than Ontario butter is selling in Toronto, but it is accounted superior to Ontario butter, as indicated by higher price in the English market.

"Before the output of New Zealand cheese was introduced to the people of British Columbia a year or two ago the sunset Province bought most of its butter in Ontario. Now Ontario dairymen cannot meet the price of the New Zealanders in the British Columbia market, Mr. Gow said.

"When the New Zealand trade commissioner first went to Vancouver eighteen months ago the imports of butter from the antipodes amounted to 350,000 pounds. During 1912 they reached nearly 8,000,000 pounds."

Your Hair may be Your Fortune

Beautiful hair has made the fortune of many a woman, by adding charm and loveliness to an otherwise plain face. Nothing means more to good looks than beautiful hair. It adds to the attractiveness of every feature. Without it you can't be beautiful!

To have beautiful hair use Harmony Shampoo. It will improve the beauty of your hair, taking away the dull hardness and stringiness, softening and polishing every hair in your head and making it soft, silky, glossy, easier to part up and keep in place, and at the same time giving it a rich and lasting rose fragrance that will delight both you and those around you.

Very easy to apply—simply sprinkle a little on your hair each time before brushing it. It contains no oil, and will not change the color of the hair, nor darken gray hair.

To keep your hair soft and dandruff-free and clean, use Harmony Shampoo. This pure liquid Shampoo gives an instantaneous rich lather that immediately penetrates to every part of the hair and scalp, loosening a quick and thorough cleansing. Washed off with water, the entire operation takes only a few moments.

Both preparations come in old-fashioned, very ornamental bottles, with sprinker tops. Harmony Hair Beautifier, \$1.00. Harmony Shampoo, 50c. Both guaranteed to satisfy you in every way. Send your money back. Sold in this community only at our store—The Royal Store—one of the more than 7,000 leading drug stores of the United States, Canada and Great Britain, which own the big Harmony Laboratories, Toronto, where the celebrated Harmony Perfumes and Toilet Preparations are made.—Suggitt Bros., Mirror, Alberta.

WORLD WIDE

Canada's Leading Literary Review

"World Wide" is a choice weekly selection of articles and cartoons reproduced from leading Journals and Reviews reflecting the current thought of the Old and New World.

To the busy man who wishes to keep in touch with the World's great events "World Wide" is invaluable. Trained experts select for him the really best articles of the week from the World's best publications. Almost every article you wish to keep or send to a friend.

"World Wide," started twelve years ago, has found its place on the study table. Preachers, teachers, writers, and thinkers generally hail it as a most welcome companion. As a pleasant tonic—a stimulant to the mind—"World Wide" has no peer at the price, no equal among the journals of the day. As someone has said, "World Wide" is a feast of reason—an intellectual treat."

Principal Peterson, L. L. D., McGill University, Montreal, says:

"I look eagerly for your weekly collection of good things, and recommend the paper warmly to my friends." Prof. H. Rhodes, West River, N. B., says:

"World Wide" is a delight to

me. Read every word." S. E. Dawson, Litt. D., Ottawa, says:

"I take a good many papers, but 'World Wide' is the only one which I read without skipping."

"World Wide" is wonderfully well edited,"—Joseph Ryan, Notary, Cranbrook, B. C. "Almost every article in almost every issue you feel you would like to put away among your treasures."

Editor, "Telegraph," Welland, Ont.

"Permit me to add one more appreciation from the Far West. 'World Wide' is a mine of information. Good to have, hard to do without."—Jno. Nicholls, Editor "Sun," Grenfell, Sask.

On trial to New Subscribers: Three months for only 25 cents; Twelve months for only \$1.00. Regular rate, \$1.50.

"World Wide" is published by John Dougall & Son, "Witness" Block, Montreal, Can. Try it for a year.

Board of Trade meets next Tuesday evening in W. C. McCormack's office. Be there.

The Eckhardt Musical Troupe played to a crowded house in Mirror last Tuesday evening. Their manipulation of the bells was excellent, and the entire program afforded pleasure and amusement. A dance followed the entertainment, music being supplied by the Eckhardt orchestra.

GOOD WORK IN AGR. SCHOOLS

The provincial schools of agriculture at Olds, Claresholm and Vermilion have just completed their first term's work, the term being concluded with the Christmas examinations.

The schools are fully justifying the expectations of the minister of agriculture and board of agricultural education. Exceedingly practical throughout, the work undertaken by the students under the direction of the staffs, is all closely related to the every day work of the farm.

Special lectures have been given by officials of the department of agriculture, including H. A. Craig, superintendent of demonstration farms; S. G. Carlisle, assistant superintendent and W. F. Stevens, live stock commissioner for the province. Mr. Craig discussed light horses and Mr. Carlyle horses, while Mr. Stevens has given several practical talks on hog raising and mink and the general management of the farm. Mr. Pearson, dairy commissioner, gives regular instruction in dairy work. The two months' domestic science course at Claresholm is just concluding and after the Christmas holidays the domestic science course at the Olds school will begin.

Both Olds and Claresholm schools are filled to capacity and a number of applications for admission have had to be refused. Vermilion has also a large enrollment.

Protection For Children Necessary

"If one-third of the boys in Canada died before reaching adult age, the government would appoint a royal commission to investigate the matter at once; but as it is only the nation's children who die in these numbers, of course, the matter is less important."

Such is the dreadful toll of human life brought about by bad housing, poor food, poverty, overwork on the part of the mother, and the general ignorance of the poor, according to the paper prepared by Dr. Evelyn Windsor, which was read by her colleague, Dr. Leacock, at the Calgary public library, under the auspices of the University of Calgary.

The question of protecting the country's children and affording them an opportunity to become real twentieth century men and women instead of dull plodding, degraded toilers was of the utmost importance. Business interests must be sacrificed to this paramount demand. In this connection, Dr. Windsor scoured the practice of child labor which has reached such grave proportions across the line, declaring that the legal school-leaving age, 14 years, was not enough, as the child had not sufficiently developed to withstand steady labor at that age.

"Eugenics should play a greater part in the matter of raising of healthy children," declared the lecturer, "and there is no doubt that the idea inculcated in this direction will make substantial ground."

Regarding the educational side of the child's life, Dr. Windsor pointed out the imperative duty of the state to provide not only proper schools, but also proper playgrounds. In this connection, special classes for defectives, the playground center movement and the story hour were meritorious steps in the right direction. Practical suggestions for mothers, pointing out the cur-

rect way in which to bring up infants by touching on the feeding, hygiene and clothing of young children were then given. There could not be too much fresh air and sleep, and the child should be allowed to eat all it wants. Too much handling is distinctly injurious. A large number of interesting slides were then shown on the screen, illustrating various phases of child life as depicted at the recent child welfare congress at Rochester, New York. These were especially interesting as showing the progress being made in matters pertaining to the welfare of children across the line, in strong contrast to the general indifference so prevalent in many parts of Canada.

Quite a Change For Him

A printer who has been publishing a paper back in a small Michigan town for five years, has decided to suspend publication. He states that, like William Jennings Bryan, he is impossible to live on his salary; also that his expenses have averaged more each week since the first of the year than his income. What else could the poor man do? We doubt very much if there is any other way than in business who do business, or try to, on a percentage of profit on their investment, and yet if an editor solicits business, advertising or otherwise, he is very frequently made to feel that he is asking for charity; if he tries to collect his subscription accounts, he finds that in many cases it is time wasted. People will continue to take a paper from the postoffice for several years and then, with impunity, refuse payment, perchance because they know there is no legal process that can extract the amount from them, or the proceedings would be too expensive to warrant the action. But, after all, there seems a sort of fascination about newspaper work that keeps a man at it and very few have the moral courage to face the question on a real business basis and quit, like the Michigan editor. Doubtless he will be able to get a position on some railroad section gang, or hire out to thin sugar beets for some of the sugar factories. In any case he will be sure of his wage and have enough to keep the wolf from the door and will not be looked on as an object of charity.—Ex.

To prevent disease— resist disease germs

SMALLPOX is prevented by vaccination — the injection of vaccine. DIPHTHERIA is prevented by the injection of anti-toxin. These enable the body to produce substances which prevent the growth of smallpox and diphtheria germs in the blood. There are many other diseases, nearly, if not quite as dangerous, and far more common — typhoid fever, the grippe, bronchitis, pneumonia, catarrh, rheumatism, and a score of others — that can be prevented less painfully and more easily by making the body strong to resist germ infection.

Rexall
TRADE MARK

Olive Oil Emulsion

(With Hypophosphites)

Is designed for the prevention as well as the relief of disease — by enabling the body to overcome the germs. It, at the same time, strengthens and tones the nerves, nourishes the blood, puts the entire system into a proper healthy condition to combat and successfully resist disease.

Every person not in perfect health has in-potent germs of some distressing ailment in his or her system.

Cold weather, over-work, excesses of any kind, are liable to bring about just the conditions under which these latent disease germs will get the upper hand, and put you on your back "down sick."

You who are run-down, tired-out, nervous — You who, though not sick enough to give up, still don't feel good —

You who are apparently well, and want to stay well — Take home a bottle of Rexall Olive Oil Emulsion today, and use it as a means to get well and keep well. Rexall Olive Oil Emulsion is a real nerve-food tonic.

In this it is different from most other so-called "tonics" which either have no food value and do nothing more than temporarily stimulate you, leaving you in a worse condition than before, or, having food value, still
